Skills Practice Review Card - Review journal

Review an attempt at skills practice review card and choose what to keep, change, or leave aside.

Adults; supported use as appropriate | 10 minutes

Fictional example: Taylor tried pausing before a message and found that a written draft helped more.

Use an ordinary or fictional example, with a clinician when appropriate. A practice record can track fit without becoming a diagnostic score.

Practice task

Record one situation, a skill attempted, what happened, and an adjustment; use no risk scoring and no identifying details.

1. What I tried, or what happened in the fictional example:

2. What I noticed before, during, and after; what remains uncertain:

3. What helped, did not help, or was outside my control:

4. What will you keep, change, or seek help with next time? My optional adjustment or support request:

Scope and adaptation

These are selected DBT-informed educational exercises, not comprehensive DBT, phone coaching, or crisis care. Use individualized clinical assessment and existing care plans. No cold-water immersion, breath holding, intense exercise prescriptions, exposure assignments, or risk scoring are included. Behavior chains and opposite-action decisions need clinician guidance when risk or complexity is present.

Original AI-assisted educational draft; independent clinical review pending. Version 1.0. Background: Dialectical Behavior Therapy Skills Training: Fundamentals. Full source links and scope: library.morethantherapy.org/approaches/resources/DBT-A20-5
