Consolidating a New Cycle - Session activity

Facilitate a structured practice of consolidating a new cycle with preparation, reflection, and an agreed closing.

Mental health professionals | 30 minutes

Fictional example: Alex notices uncertainty, asks once, and Sam gives a realistic response time.

0-5 min | Agree on purpose and fit

Explain the educational scope. Ask what would be useful, check readiness and access needs, and establish choices to observe, adapt, or pass. Use an ordinary example; do not solicit trauma narratives.

5-10 min | Orient with an example

New interaction patterns can be named and revisited. Fictional example: Alex notices uncertainty, asks once, and Sam gives a realistic response time. Ask what is observed and what remains uncertain.

10-20 min | Practice and compare

Describe an old loop, a newer sequence, and the specific actions each person wants to keep practicing. Offer quiet individual work, a supported conversation, or an observing role. Compare two possible responses without evaluating people as right or wrong.

20-25 min | Reflect on meaning

What helps the new sequence remain flexible rather than become another rule? Ask what fit, what did not fit, and how culture, power, disability access, or external conditions affect the options.

25-30 min | Integrate and close

Invite one optional next step or support request. Orient to the current setting, allow an unfinished question to remain unfinished, and agree how to revisit it. End early or adapt if activation increases.

Adaptations

For a group, use fiction and no compulsory round-robin disclosure. For remote use, allow off-camera reflection and private notes. For brief use, keep one example and one question while retaining opening and closing choices.

Reflection

What adaptation or follow-up is needed?

Scope and adaptation

Joint exercises require private safety assessment, voluntary participation, and appropriate EFT training. Do not invite joint vulnerability, enactments, or disclosure where coercion, violence, fear, or retaliation may be present. Use individual support and appropriate referrals instead. This collection concerns attachment-based Emotionally Focused Therapy, not tapping or Emotional Freedom Techniques.
