Problem-Solving When Action Fits - Practice worksheet

Define a solvable part of a problem, generate options, compare access and consequences, and select a small test.

Adults; supported use as appropriate | 15 minutes

Fictional example: Taylor's recurring stress comes partly from unclear appointment reminders.

Use an ordinary or fictional example, with a clinician when appropriate. Some emotional situations call for practical change.

Practice task

Define a solvable part of a problem, generate options, compare access and consequences, and select a small test.

1. My chosen or fictional situation, and what I know about it:

2. My response to the practice task above:

3. Which part of the problem can be changed with available support?

4. An optional next step, support, adaptation, or reason to stop:

Scope and adaptation

These are selected DBT-informed educational exercises, not comprehensive DBT, phone coaching, or crisis care. Use individualized clinical assessment and existing care plans. No cold-water immersion, breath holding, intense exercise prescriptions, exposure assignments, or risk scoring are included. Behavior chains and opposite-action decisions need clinician guidance when risk or complexity is present.
