Here-and-Now Awareness - Review journal

Review an attempt at here-and-now awareness and choose what to keep, change, or leave aside.

Adults; supported use as appropriate | 10 minutes

Fictional example: Rae notices the clock and thinks the session is almost over.

Use an ordinary or fictional example, with a clinician when appropriate. Notice current experience before explaining it.

Practice task

Describe three details in the room, one thought, and an optional feeling without deciding what they mean.

1. What I tried, or what happened in the fictional example:

2. What I noticed before, during, and after; what remains uncertain:

3. What helped, did not help, or was outside my control:

4. Which observation feels most useful to stay with briefly? My optional adjustment or support request:

Scope and adaptation

Keep experiments collaborative and low intensity. Chair-based or unfinished-business exploration belongs with appropriately trained clinicians after assessment, with a stop cue and an observing alternative. Do not interpret symbols, recover memories, force body focus, or use cathartic confrontation.
