Needs into Awareness - Review journal

Review an attempt at needs into awareness and choose what to keep, change, or leave aside.

Adults; supported use as appropriate | 10 minutes

Fictional example: Rae becomes impatient during a long meeting and considers a break or clearer information.

Use an ordinary or fictional example, with a clinician when appropriate. A felt signal may invite curiosity about a present need.

Practice task

List several possible needs behind an ordinary discomfort, then identify what you want to ask rather than assuming one answer.

1. What I tried, or what happened in the fictional example:

2. What I noticed before, during, and after; what remains uncertain:

3. What helped, did not help, or was outside my control:

4. Which need is a possibility worth checking? My optional adjustment or support request:

Scope and adaptation

Keep experiments collaborative and low intensity. Chair-based or unfinished-business exploration belongs with appropriately trained clinicians after assessment, with a stop cue and an observing alternative. Do not interpret symbols, recover memories, force body focus, or use cathartic confrontation.
