Deliberate and Accidental Exceptions - Session activity

Facilitate a structured practice of deliberate and accidental exceptions with preparation, reflection, and an agreed closing.

Mental health professionals | 30 minutes

Fictional example: Devin worked well in a quiet waiting room without planning to.

0-5 min | Agree on purpose and fit

Explain the educational scope. Ask what would be useful, check readiness and access needs, and establish choices to observe, adapt, or pass. Use an ordinary example; do not solicit trauma narratives.

5-10 min | Orient with an example

A helpful difference can be noticed even when it was unplanned. Fictional example: Devin worked well in a quiet waiting room without planning to. Ask what is observed and what remains uncertain.

10-20 min | Practice and compare

Compare one intentional change with one helpful accident and identify what can be repeated. Offer quiet individual work, a supported conversation, or an observing role. Compare two possible responses without evaluating people as right or wrong.

20-25 min | Reflect on meaning

What part of the accident can become a chosen support? Ask what fit, what did not fit, and how culture, power, disability access, or external conditions affect the options.

25-30 min | Integrate and close

Invite one optional next step or support request. Orient to the current setting, allow an unfinished question to remain unfinished, and agree how to revisit it. End early or adapt if activation increases.

Adaptations

For a group, use fiction and no compulsory round-robin disclosure. For remote use, allow off-camera reflection and private notes. For brief use, keep one example and one question while retaining opening and closing choices.

Reflection

What adaptation or follow-up is needed?

Scope and adaptation

Acknowledge distress and structural barriers before asking about change. Do not use exceptions or compliments to dismiss harm. A personal scale is a conversational aid, not a validated outcome measure, risk screen, or reason to withhold assessment.
