Scaling in Your Own Words - Practice worksheet

Define both ends of a personal scale, choose a current position, and describe what supports it.

Adults; supported use as appropriate | 15 minutes

Fictional example: Devin rates readiness as four and explains what makes it more than one.

Use an ordinary or fictional example, with a clinician when appropriate. A scale is a conversation aid rather than a validated score.

Practice task

Define both ends of a personal scale, choose a current position, and describe what supports it.

1. My chosen or fictional situation, and what I know about it:

2. My response to the practice task above:

3. What does your chosen number mean in everyday behavior?

4. An optional next step, support, adaptation, or reason to stop:

Scope and adaptation

Acknowledge distress and structural barriers before asking about change. Do not use exceptions or compliments to dismiss harm. A personal scale is a conversational aid, not a validated outcome measure, risk screen, or reason to withhold assessment.
