Setback as Information - Review journal

Review an attempt at setback as information and choose what to keep, change, or leave aside.

Adults; supported use as appropriate | 10 minutes

Fictional example: Devin's morning routine became harder when transport changed.

Use an ordinary or fictional example, with a clinician when appropriate. A difficult day can inform the plan without erasing earlier progress.

Practice task

Compare a setback with a better day, identifying changed conditions and retained resources.

1. What I tried, or what happened in the fictional example:

2. What I noticed before, during, and after; what remains uncertain:

3. What helped, did not help, or was outside my control:

4. Which condition changed, and what still helps? My optional adjustment or support request:

Scope and adaptation

Acknowledge distress and structural barriers before asking about change. Do not use exceptions or compliments to dismiss harm. A personal scale is a conversational aid, not a validated outcome measure, risk screen, or reason to withhold assessment.
