Ending with a Useful Summary - Clinician dialogue

Guide a collaborative conversation about ending with a useful summary while checking fit and participant choice.

Mental health professionals | 15 minutes

Fictional example: Devin wants a summary that does not turn possibilities into promises.

Invite and obtain permission

Offer: "Would it be useful to explore ending with a useful summary using an ordinary or fictional example? We can adapt it, observe, or stop." Ask what the person wants from the conversation.

Elicit before teaching

Ask: "How does this show up, if at all, in your own words?" Offer this idea tentatively: A closing summary can use the person's language and preserve uncertainty. Ask what fits and what does not.

Guide the task

Summarize the preferred difference, one existing resource, and an optional next step; invite correction. Ask for permission before giving an example. Use this fictional illustration if useful: Devin wants a summary that does not turn possibilities into promises.

Reflect and check accuracy

Reflect only what was offered: "I heard you describe ___. What did I miss?" Ask: What would you change in this account of today's conversation? Avoid assigning motives or interpreting silence as agreement.

Respond to a mismatch

If the person rejects the frame, say: "Thank you for correcting it. What would be more useful?" Return to their language or choose a different approach.

Close with agency

Ask which observation, question, or support request the person wants to keep. Confirm a manageable ending and appropriate follow-up; do not turn a tentative possibility into a homework obligation.

Reflection

What would tell me to adapt, stop, or seek supervision?

Scope and adaptation

Acknowledge distress and structural barriers before asking about change. Do not use exceptions or compliments to dismiss harm. A personal scale is a conversational aid, not a validated outcome measure, risk screen, or reason to withhold assessment.
