Digital Attention Boundaries

Life Skills & Wellness | 20 minutes | 3-12 participants | Adults and teens 13+ with appropriate facilitation

Purpose

Test one reversible change to notifications while protecting necessary access.

Materials: Paper or a printable handout, Pens or an accessible writing alternative, Optional blank cards or simple drawing materials

Invite and agree - 3 minutes

Name the purpose and the right to pass, observe, write, or use fiction. Agree that people share only their own experiences and do not promise absolute group confidentiality.

Introduce the example - 3 minutes

A person wants fewer interruptions during a chosen activity. Ask what is known and what is still a guess.

Practice: Practice experiment - 7 minutes

Test one reversible change to notifications while protecting necessary access. Agree on a short, reversible test and what to notice. Try or simulate it, then compare observations without scoring people.

Reflect together - 4 minutes

What would make the experiment useful? Ask what fit, what did not fit, and what would make the exercise more accessible. Do not interpret another person's response.

Choose a next step - 3 minutes

Invite one optional action, support request, or question to carry forward. Passing is a valid closing response. Confirm how to seek appropriate support outside the activity.

Facilitator fit and boundaries

Adapt to disability, resources, schedules, and cultural preferences. Avoid prescribing diets, exercise targets, or medical treatment.

Offer observation, private writing, or a fictional example. Adapt instructions and group size to access needs. No client responses are collected by this page.
