Introduce the example - 3 minutes

Illness interrupts a new routine. Ask what is known and what is still a guess.

Practice: Mapping - 17 minutes

Plan how to resume a chosen activity after interruption without requiring a perfect streak. Create a simple diagram or table. Label relationships, gaps, or choices; participants decide which connections fit.

Reflect together - 4 minutes

What is the first step back? Ask what fit, what did not fit, and what would make the exercise more accessible. Do not interpret another person's response.

Choose a next step - 3 minutes

Invite one optional action, support request, or question to carry forward. Passing is a valid closing response. Confirm how to seek appropriate support outside the activity.

Facilitator fit and boundaries

Respect ambivalence and the option not to change. Do not use ratings to pressure compliance.

Offer observation, private writing, or a fictional example. Adapt instructions and group size to access needs. No client responses are collected by this page.
