Activation Without Diagnosis

Trauma Stabilization | 30 minutes | 3-12 participants | Adults with appropriate facilitation

Purpose

Describe personally chosen everyday cues of overwhelm without assigning causes or diagnoses.

Materials: Paper or a printable handout, Pens or an accessible writing alternative, Optional blank cards or simple drawing materials

Invite and agree - 3 minutes

Name the purpose and the right to pass, observe, write, or use fiction. Agree that people share only their own experiences and do not promise absolute group confidentiality.

Introduce the example - 3 minutes

A character finds a busy waiting area difficult. Ask what is known and what is still a guess.

Practice: Mapping - 17 minutes

Describe personally chosen everyday cues of overwhelm without assigning causes or diagnoses. Create a simple diagram or table. Label relationships, gaps, or choices; participants decide which connections fit.

Reflect together - 4 minutes

What cue indicates a need to adjust the environment? Ask what fit, what did not fit, and what would make the exercise more accessible. Do not interpret another person's response.

Choose a next step - 3 minutes

Invite one optional action, support request, or question to carry forward. Passing is a valid closing response. Confirm how to seek appropriate support outside the activity.

Facilitator fit and boundaries

Present-focused skills only. No trauma narratives, exposure, surprise touch, or requests to revisit traumatic events.

Offer observation, private writing, or a fictional example. Adapt instructions and group size to access needs. No client responses are collected by this page.
