Plan Adjustment Meeting - Supported Practice Lab

You may write, draw, think quietly, use fiction, observe, or pass. Share only what you choose. This educational activity is not a test.

Fictional example: A member wants a different level of support but is unsure how to ask.

1. What is known in the fictional example, and what needs checking?

2. Create a short collaborative agenda for reviewing treatment fit after a return to use. My notes, drawing, or possible response:

3. What question belongs at the start of the review?

4. One optional next step, support, or reason to revise the idea:

You can pause or stop. Ask your facilitator for an alternative if this does not fit. No identifying information belongs in shared copies. Independent clinical review pending.
