Building Social Support - Practice worksheet

Map people and services by the kind of support they can realistically provide.

Adults; supported use as appropriate | 15 minutes

Fictional example: Casey has a relative for transport and a peer for companionship.

Use an ordinary or fictional example, with a clinician when appropriate. Social support can include practical assistance, companionship, and chosen family.

Practice task

Map people and services by the kind of support they can realistically provide.

1. My chosen or fictional situation, and what I know about it:

2. My response to the practice task above:

3. Where is support reliable, and where is another option needed?

4. An optional next step, support, adaptation, or reason to stop:

Scope and adaptation

Original IMR-informed companion exercises, not the official IMR manual, fidelity assessment, or complete IMR program. Use collaborative clinical assessment and existing care plans. Do not change medication independently, challenge distressing beliefs through confrontation, or use worksheets to determine urgency. Increased or concerning symptoms need appropriate clinical assessment.

Original AI-assisted educational draft; independent clinical review pending. Version 1.0. Background: Illness Management and Recovery Evidence-Based Practices KIT. Full source links and scope: library.morethantherapy.org/recovery/resources/IMR-A11-2
