Involving Supporters by Consent - Practice worksheet

Choose what may be shared, with whom, for what purpose, and how permission can change.

Adults; supported use as appropriate | 15 minutes

Fictional example: Casey wants a friend involved in planning but not in every clinical conversation.

Use an ordinary or fictional example, with a clinician when appropriate. Supporter involvement should respect the person's privacy and preferences.

Practice task

Choose what may be shared, with whom, for what purpose, and how permission can change.

1. My chosen or fictional situation, and what I know about it:

2. My response to the practice task above:

3. What boundaries would make involvement more useful?

4. An optional next step, support, adaptation, or reason to stop:

Scope and adaptation

Original IMR-informed companion exercises, not the official IMR manual, fidelity assessment, or complete IMR program. Use collaborative clinical assessment and existing care plans. Do not change medication independently, challenge distressing beliefs through confrontation, or use worksheets to determine urgency. Increased or concerning symptoms need appropriate clinical assessment.

Original AI-assisted educational draft; independent clinical review pending. Version 1.0. Background: Illness Management and Recovery Evidence-Based Practices KIT. Full source links and scope: library.morethantherapy.org/recovery/resources/IMR-A12-2
