# Support Person Preferences - Concept brief

Understand the idea behind support person preferences and consider whether it fits your context.

Adults; supported use as appropriate | 8 minutes

Fictional example: Jordan wants a check-in call but not repeated questioning.

## The idea

Support is more useful when its form and limits are agreed.

## An ordinary example

Jordan wants a check-in call but not repeated questioning.

## What this can look like

Create a menu of wanted support, unwanted responses, and ways to check consent.

## Check the fit

How will your support person know what helps? You may disagree with the framing, use fiction, or decide that this approach is not useful today.

## A useful distinction

A return to use is information for reassessing care and support, not a verdict on personal worth.

## Reflection

How will your support person know what helps?

## Scope and adaptation

Adapt to individualized assessment and the person's chosen recovery goals. Worksheets do not manage intoxication, overdose, or withdrawal. Abrupt cessation of alcohol or benzodiazepines can be dangerous: seek medical guidance rather than using a worksheet to stop or taper. Follow existing emergency and overdose-prevention plans; medication choices belong with qualified prescribers.
