Sleep and Routine Supports - Practice worksheet

Identify one feasible anchor in the day and a backup for disrupted schedules without prescribing sleep or medical treatment.

Adults; supported use as appropriate | 15 minutes

Fictional example: Jordan works changing shifts and chooses a brief check-in after waking.

Use an ordinary or fictional example, with a clinician when appropriate. Routine planning must account for health, work, and access.

Practice task

Identify one feasible anchor in the day and a backup for disrupted schedules without prescribing sleep or medical treatment.

1. My chosen or fictional situation, and what I know about it:

2. My response to the practice task above:

3. What routine is flexible enough to survive a difficult day?

4. An optional next step, support, adaptation, or reason to stop:

Scope and adaptation

Adapt to individualized assessment and the person's chosen recovery goals. Worksheets do not manage intoxication, overdose, or withdrawal. Abrupt cessation of alcohol or benzodiazepines can be dangerous: seek medical guidance rather than using a worksheet to stop or taper. Follow existing emergency and overdose-prevention plans; medication choices belong with qualified prescribers.
