Inherited and Chosen Directions - Session activity

Facilitate a structured practice of inherited and chosen directions with preparation, reflection, and an agreed closing.

Mental health professionals | 30 minutes

Fictional example: Avery values family connection but questions an expectation of constant availability.

0-5 min | Agree on purpose and fit

Explain the educational scope. Ask what would be useful, check readiness and access needs, and establish choices to observe, adapt, or pass. Use an ordinary example; do not solicit trauma narratives.

5-10 min | Orient with an example

A person can respect influences while examining which directions they freely endorse. Fictional example: Avery values family connection but questions an expectation of constant availability. Ask what is observed and what remains uncertain.

10-20 min | Practice and compare

Separate messages received from family or culture from qualities you currently choose, allowing overlap and uncertainty. Offer quiet individual work, a supported conversation, or an observing role. Compare two possible responses without evaluating people as right or wrong.

20-25 min | Reflect on meaning

What do you want to carry forward, adapt, or decline? Ask what fit, what did not fit, and how culture, power, disability access, or external conditions affect the options.

25-30 min | Integrate and close

Invite one optional next step or support request. Orient to the current setting, allow an unfinished question to remain unfinished, and agree how to revisit it. End early or adapt if activation increases.

Adaptations

For a group, use fiction and no compulsory round-robin disclosure. For remote use, allow off-camera reflection and private notes. For brief use, keep one example and one question while retaining opening and closing choices.

Reflection

What adaptation or follow-up is needed?

Scope and adaptation

Values are personally chosen directions, not moral rankings or evidence of worth. Recognize structural barriers, disability access, and culturally varied meanings. Do not turn willingness into exposure to danger, excuse coercion, or prescribe one life path. These original exercises do not constitute a complete ACT protocol.
