Faith and Values by Choice - Session activity

Facilitate a structured practice of faith and values by choice with preparation, reflection, and an agreed closing.

Mental health professionals | 30 minutes

Fictional example: Avery values spiritual practice but does not want it used as a demand for forgiveness.

0-5 min | Agree on purpose and fit

Explain the educational scope. Ask what would be useful, check readiness and access needs, and establish choices to observe, adapt, or pass. Use an ordinary example; do not solicit trauma narratives.

5-10 min | Orient with an example

Spiritual or secular meaning can be explored without pressure to adopt a belief. Fictional example: Avery values spiritual practice but does not want it used as a demand for forgiveness. Ask what is observed and what remains uncertain.

10-20 min | Practice and compare

Identify a personally chosen source of meaning and a behavior that expresses it while respecting others' autonomy. Offer quiet individual work, a supported conversation, or an observing role. Compare two possible responses without evaluating people as right or wrong.

20-25 min | Reflect on meaning

What meaning is freely chosen here? Ask what fit, what did not fit, and how culture, power, disability access, or external conditions affect the options.

25-30 min | Integrate and close

Invite one optional next step or support request. Orient to the current setting, allow an unfinished question to remain unfinished, and agree how to revisit it. End early or adapt if activation increases.

Adaptations

For a group, use fiction and no compulsory round-robin disclosure. For remote use, allow off-camera reflection and private notes. For brief use, keep one example and one question while retaining opening and closing choices.

Reflection

What adaptation or follow-up is needed?

Scope and adaptation

Values are personally chosen directions, not moral rankings or evidence of worth. Recognize structural barriers, disability access, and culturally varied meanings. Do not turn willingness into exposure to danger, excuse coercion, or prescribe one life path. These original exercises do not constitute a complete ACT protocol.
